Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group II in the reply filed on November 15, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 22 recites that the Braille cell cap comprises a plurality of buttons and comb-like holder; however, it appears from the specification that the features are part of the larger assembly, and not part of the cap. Also, claims 23-25 recite s Braille cell assembly in the preamble, but they depend from claims 21 and 22, which are directed to a Braille cell cap. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3711

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 21 is rejected under 35 U.S.C. 102(e) as being anticipated by Schleppenbach. Schleppenbach discloses in Figures 1 and 2 and in the specification a monolithic Braille cell cap 22 and an associated assembly, where the cell cap covers a plurality of Braille cells 32 and has a plurality of apertures 30a, each aperture adapted to receive a single tactile cell pin 34.

Allowable Subject Matter

Claims 22-25 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: There is no disclosure or suggestion of a device having all of the claimed limitations. In particular, there is no disclosure or suggestion of a Braille cell assembly having a plurality of buttons and associated comb-like holder having the features recited in claim 22. As a result, claim 22 and its dependents contain allowable subject matter, subject to overcoming the rejections under 35 USC 112.

Art Unit: 3711

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahashi, Hong, Koch, Carro, Goldenbert, Roberts, Prince, Depta, Becker, Schmidt, Litschel, Hong, Murphy, Tani, Kashi, Nakajima, Johnson and Burchart disclose various tactile assemblies.
